

## Deal4U – Global Master Overview (Multilingual & Multicurrency Edition)

Created by Hashim Mohamed and Team | Nimble AppGenie | Think it, we build it.

### 1 INTRODUCTION – What Is Deal4U

Deal4U is a bilingual (English/French) community commerce app that allows users to see, share, and shop real deals from local stores and online retailers. It evolves through three key phases, expanding across Canada, the United States, and international markets with multilingual and multicurrency capabilities.

Core Vision: “Connect local savings, global payments, and community-driven commerce in one ecosystem.”

### 2 MODULE STRUCTURE & PHASE OVERVIEW

Deal4U’s development and launch strategy expands regionally and linguistically as follows:

| Phase   | Region        | Languages                                                     | Currencies                               | Focus                                                                                                         |
|---------|---------------|---------------------------------------------------------------|------------------------------------------|---------------------------------------------------------------------------------------------------------------|
| Phase 1 | Canada        | English, French                                               | CAD                                      | Community + Flyers – Build local engagement and merchant visibility.                                          |
| Phase 2 | United States | English, Spanish                                              | USD                                      | Online Deals + Payments – Enable reservations, payments, and affiliate programs.                              |
| Phase 3 | Global        | English, French, Spanish, Mandarin, Hindi, Arabic, Portuguese | CAD, USD, EUR, GBP, INR, AUD, USDT, USDC | Wallet + Global Expansion – Multilingual, multicurrency wallet, cross-border payments, and loyalty ecosystem. |

### 3 FEATURE ROADMAP TABLE (Client Checklist)

| # | Feature                        | Phase   | Description                                                       | <input checked="" type="checkbox"/> Client Check |
|---|--------------------------------|---------|-------------------------------------------------------------------|--------------------------------------------------|
| 1 | User Registration              | Phase 1 | Simple signup using name, email, and password.                    | <input type="checkbox"/> H                       |

## MONETIZATION STRATEGY

### Phase 1 – Community & Merchant Launch

Focus: Build traffic and merchant trust.

- Merchant flyer upload & promotion fees (\$50–\$200/month).
- Sponsored listings and ads.
- Local banner ads (AdMob or direct).
- Affiliate links.
- Basic analytics reports.

### Phase 2 – Online Purchase & Transaction Stage

Focus: Begin transaction monetization.

- Transaction fees (1–2.5%) per purchase.
- Premium merchant dashboards (\$20–\$100/month).
- Paid email and push campaigns.
- Affiliate programs and data insights.

### Phase 3 – Wallet & Global Expansion

Focus: Establish global fintech ecosystem.

- Wallet transaction fees (1–2%).
- FX margin (0.5–1%) on multicurrency exchanges.
- Loyalty & Deal4U Coin sales.

- API licensing and advanced analytics.
- Merchant financing and Ad Network 2.0.
